- Realization of drag and drop.
Stack:
- Angular, JS, SCSS, npm, gulp, git, webpack.

August 2017 — February 2019
1 year 7 months

MTS

Russia, www.mts.ru

Frontend developer

As a part of a team, I am developing SPA application on Angular. This application is made for the operators that serves customers in MTS shops.
I am working with the following stack of technologies:
- Angular, TS, JS(ES6+), SASS, npm, gulp, git, webpack, REST API.

I did:
1. A web-component which automaticly makes several pictures of the user. (Integration with bank.)
2. I did a dropzone component with swiper.
3. I did a menu component.
4. I did a dropdown component which we call "important comments".

Tehnosila.ru - internet-shop

Saint Petersburg, tehnosila.ru

HTML layout designer

I developed interface elements of the internet-store tehnosila.ru. Also I developed product landing pages and sales pages of the internet-shop and made electronic mailing.

Some examples of my work:
https://github.com/ERazina/gardena
https://github.com/ERazina/antiTangle
https://github.com/ERazina/oneBlade

Also I took part in developing credit-broker interface in mobile site version.

Technologies I used:
HTML, LESS, jQuery.

For electronic mailing I used gulp, npm and yarn.

The left the company because the company was closed.

My github: www.github.com/ERazina - here you can see several of my projects.

Education

Master
